

Bleach Wash Instructions

A) BEFORE USE

- Avoid washing your hair for 48 hours prior to application.
- Read the Safety Directions and complete the Sensitivity Test according to the rear of the Hi Lift bleach sachet.
- Follow these Bleach Wash Instructions, not the instructions on the Hi Lift bleach sachet.

B) PREPARATION

- Wear a front-opening robe or shirt.
- Put on the gloves and protective cape.
- Wet your hair and towel dry it before preparing your bleach wash mix.

C) MIXING

- Use the tint brush (or whisk) and bowl to prepare your bleach wash.
- Start by emptying the sachet of bleach powder and developer into your tint bowl.
- Mix the bleach powder and developer together.
- To this mixture you add the same quantity of shampoo as the quantity of bleach and developer combined (use any regular shampoo you have at home for this, and use the Colour Protection Shampoo we provide to wash your hair when you have rinsed out the bleach wash).

D) APPLICATION

- Apply the bleach wash evenly throughout the lengths and ends of your hair. Apply the mixture to the roots last.
- Leave the mixture in for 10-20 minutes, depending on the colour result you are looking to achieve. Wash it out in shower, then shampoo and condition your hair with the Colour Protection Shampoo and Conditioner provided in your Bleach Wash pack.

Please note - Colouring or toning after a bleach wash is an essential part of the lightening process.
